# Golden Rules in Managing Satellite Accumulation Areas

4 Safety

- Request pickup when a container is full, but not more than 9 months (275 days) from initial accumulation.
- Do not overfill containers. This may cause a potential hazard to waste technicians.
- Container labels are completely filled out with appropriate information to convey the hazard.
- All waste containers are stored in the SAA in appropriate secondary containment.
- All waste is stored in a compatible container.
- All waste containers are closed.
